GIUSEPPE PUCCI

Curriculum Vitae

National Research Council of Italy, CNR-Nanotec - Ponte P. Bucci, Cubo 33C, Rende 87036 Italy giuseppe.pucci@cnr.it - www.gpucci.net

I am a **researcher in physics** at the *National Research Council of Italy* (CNR), based at the Department of Physics of the University of Calabria.

Previously, I worked at the Institut de Physique de Rennes (France), Brown University (USA), Massachusetts Institute of Technology (USA), Università della Calabria (Italy), and Université Paris Diderot (France).

My research focuses on phenomena at *fluid interfaces* with the aim of contributing to the fields of fundamental **fluid dynamics**, *active* **complex systems**, and **quantum foundations**, the latter by developing classical *analogues of quantum phenomena*. My research occasionally touches on *physics teaching*, soft matter, and applied physics.

I am fascinated by the possibility of exploring **fundamental questions** in physics by working on **table-top experiments**. My research approach thus combines relatively low-cost experimental physics with **theoretical modeling**, and benefits from continuous collaboration with theorists.

EDUCATION

University of Paris VII Denis Diderot and University of Calabria. Ph.D. in Physics: Fluid Dynamics and Science of Mesophases. Mention: Very Honorable, with Committee Praise.	France/Italy 2008–2011
Committee composed of: <i>Riccardo Barberi</i> (Università della Calabria, co-supervisor); Roberto Bartolino (Università della Calabria, examiner); Martine Ben Amar (École Normale Supérieure, examiner); Christophe Clanet (CNRS - École Polytechnique, president); <i>Yves Couder</i> (Université Paris VII Denis Diderot, supervisor) Francesco Mantegazza (Università di Milano Bicocca, referee) Marc Rabaud (Université Paris-Sud, referee).	,
 Research on the Faraday instability in floating drops: an example of a hydrodynamic is domain with flexible boundaries. Collaboration with Prof. Martine Ben Amar (ENS Pa - Experimentally characterized and theoretically rationalized the equilibrium shapes of drops deformed by the radiation pressure of surface waves. Experimentally characterized the non-equilibrium behavior of floating drops deformed pressure; rationalized their self-propulsion. 	ris). floating liquid
 Research on electrohydrodynamics and topological defects in nematic liquid crystals. Characterized the variation of the threshold of a topological transition in nematic function of the concentration of the components. 	mixtures as a
University of Calabria.RenMaster in Physics of Matter. 110/110 cum laudeRen	de (CS), Italy 2006–2008
 Six-month internship at University Paris VII: Faraday instability in deformable domain Investigated the equilibrium shapes of drops deformed by the radiation pressure of sur 	
University of Calabria.RenBachelor in Physics. 110/110 cum laudeRen	de (CS), Italy 2003–2006
 Three-month internship at University of Calabria: "A novel method to create probes for spectroscopy". Developed a new technique to obtain probes for the Atomic Force Microscope with a typ radius of 100 nm. 	

National Research Council of Italy (CNR), Institute of Nanotechnology. Rende, Italy Researcher 2021-present

- · Research topics: classical analogs of quantum mechanics, wave-particle interactions, active systems, fluid dynamics, physics education.
- From 2023 I am part of the project in theoretical physics entitled "Particles and Fields in Turbulence and in Complex Flows" (FIELDTURB) funded by the Italian National Institute for Nuclear Physics (INFN).

Institute of Physics of Rennes, CNRS and University of Rennes 1. Rennes, France Researcher funded by the program CNRS-Momentum. 2018-2020

- · PI of the project "Self-organization of fluid and solid structures on fluid interfaces at the macroscopic scale". Supervising a post-doc. Topics:
- Active volatile drops on liquid baths.
- Faraday instability in a rotating liquid.
- Capillary surfers: wave-driven particles at a fluid interface (with Prof. D. Harris at Brown University).

Brown University, School of Engineering.	Providence (RI), USA
Post-doctoral Research Associate in the group of Prof. Daniel M. Harris.	2017 – 2018
· Research subject: Forces on capillary floaters	

Research subject: Forces on capillary floaters.

- Experimentally characterized and theoretically rationalized the friction experienced by centimetric objects that slide on water.

- Experimentally characterized and theoretically rationalized the capillary attraction between centimetric objects resting on water ("Cheerios effect").

Massachusetts Institute of Technology, Dept. of Mathematics.	Cambridge (MA), USA
Post-doctoral Research Associate in the group of Prof. John W. M. Bush.	2015 – 2017

· Research subject: Walking droplets as a hydrodynamic analog of microscopic systems.

- Characterized the non-specular reflection of a walking droplet from a planar wall.
- Characterized the interaction of walking droplets with single and double slits.
- Characterized the refraction-like behavior of walking droplets experiencing a reduction in liquid depth.
- Experimentally investigated the diffusion of a droplet bouncing on a field of standing waves.
- Experimentally investigated the spin lattices of walking droplets.

University of Calabria, Dept. of Physics.

Rende (CS), Italy 2012-2015

Post-doc in the group of Prof. Riccardo Barberi

Research on the project "Innovative nanotechnologic platforms for drugs delivery in Ophthalmology". Collaboration with Marco Lombardo (Doctor of Medicine, Vision Engineering Italy).

- PI of the group investigating the interaction of ultraviolet light with the human cornea.

- Designed an apparatus that mimics the physiological conditions of the eve for the purpose of measuring the light absorbance of the human cornea and detecting the presence of clinical solutions inside the tissue.

- Tested a number of trans-epithelial commercial solutions: assessed which solutions were effectively absorbed and could be used for medical treatment.

Research subject n.2: electro-convective instabilities and topological defects in nematic liquid crystals. - Discovered curved patterns of electro-convection in nematics with planar-periodic alignment.

- Characterized the topologically non-equivalent textures generated by the electrohydrodynamics of nematic liquid crystals.

- RESEARCH VISITS

ESPCI Paris	Paris, France
One-month visit to the laboratory "Physique et Mécanique des Milieux Hété	rogènes" (PMMH). 2023
· Research subject: hydroelastic waves.	
Brown University, School of Engineering.	Providence (RI), USA
Two-month visit to the group of Prof. Daniel M. Harris.	Summer 2022
\cdot Research subject: wave-mediated interactions of surface spinners.	
Brown University, School of Engineering.	Providence (RI), USA
Two-month visit to the group of Prof. Daniel M. Harris.	Summer 2019

· Research subject: capillary surfers, wave-driven particles at a vibrating fluid interface.

Massachusetts Institute of Technology, Dept. of Mathematics.Cambridge (MA), USAEight-month visit as a post-doctoral Fellow in the group of Prof. John W. M. Bush.2014

- Experimentally demonstrated and theoretically rationalized the partial coalescence of a soap bubble with a soap film.

- Designed and set up an experiment for the study of walking droplets interacting with a single slit.

GRANTS

Short-Term Mobility grant.	CNR-Nanotec, Rende, Italy
National Research Council of Italy (CNR).	2022
To visit the Harris' Laboratory in the School of Engi	neering at Brown University (RI), USA.
Short-Term Mobility grant.	CNR-Nanotec, Rende, Italy
National Research Council of Italy (CNR).	2021
· 2100€ for the visit to CNR-Nanotec of Antonin Eddi	, researcher in the French CNRS.
 Project grant. French National Center for Scientific Research (CNF) About 350 k€ (included a personal salary and two-yet) 	
Workshop grant.	Brown University, USA
National Science Foundation of U.S.A. (NSF), Cond	Lensed Matter Physics program. 2018
\cdot 5000 $\$$ for organizing the workshop "Hydrodynamic award number 1841840).	Quantum Analogs 8" (with Prof. Daniel Harris,
Mobility grant.	University of Paris VII, France
Université Franco-Italienne.	2009–2011

• About 4500 \in to spend for travels during the Ph.D.

FELLOWSHIPS

Post-doctoral Fellowship The Hatter Departement of Marine Technology.	University of Haifa, Israel 2015–2016
\cdot To spend at the Massachusetts Institute of Technology, Cambridge (M.	A).
Ph.D. fellowship. <i>Ph.D. funded by Université Franco-Italienne</i>	University of Paris VII, France 2008–2011
\cdot To spend at University of Paris VII (main institution) and University tion).	of Calabria (secondary institu-
AWARDS

 $\cdot\,$ Presentation "Faraday instability in deformable domains".

TEACHING EXPERIENCE

Teaching Assistant of 'Physics of Fluids'.	Univ. of Calabria, Italy
Developing experimental projects with 2nd-year bachelor students in F	Physics. Fall 2024
Instructor of 'Foundations of Quantum Mechanics'.	Univ. of Calabria, Italy
Bachelor students in Physics.	Fall 2023 and 2024
\cdot 'Excellence Program' (percorso di eccellenza) of the Department of Pl	hysics.
Instructor of 'Introduction to Nonlinear Physics'.	Univ. of Calabria, Italy
Bachelor students in Physics.	Fall 2024
\cdot 'Excellence Program' (percorso di eccellenza) of the Department of Pl	hysics.
Teaching 'Mentoring Projects in Experimental Physics'.	Univ. of Calabria, Italy
Bachelor students in Physics.	Spring 2024
\cdot 'Excellence Program' (percorso di eccellenza) of the Department of Pl	hysics.
Teaching 'Projects in Experimental Physics' (PhyExp).	Univ. of Calabria, Italy
Advanced development of an experimental project with master student	ts in Physics. Spring 2023
\cdot 'Excellence Program' (percorso di eccellenza) of the Department of Pl	hysics.
Teaching Assistant of Lab. of Mechanics and Thermodynam	ics. Univ. of Calabria, Italy
Developing experimental projects with bachelor students in Physics.	Spring 2022, 2023 and 2024
Teaching Assistant of Scientific Data Acquisition and Proces	sing. Univ. of Calabria, Italy
Developing experimental projects with master students in Physics.	Fall 2021, 2022 and 2023
Instructor of Macroscopic Quantum Analogs. PhD students in Physical, Chemical, Materials Sciences and Technology	Univ. of Calabria, Italy ogies. Summer 2021, Fall 2022
Assistant Instructor of Electricity and Magnetism.	Univ. of Calabria, Italy
Bachelors in Electronic Engineering.	Spring 2021
Assistant Instructor of Fluid Mechanics.	Univ. of Rennes 1, France
Master in Fundamental Physics.	Fall 2019 and 2020
Instructor of Fluid Mechanics.	Univ. of Rennes 1, France
Master in Fundamental Physics.	Fall 2018
Teaching Assistant (Instructor) of Differential Equations.	MIT, USA
1st year bachelor level. Overall rating: 6.2/7.	Spring 2017
Assistant Instructor of Quantum Mechanics and General Phy	ysics. Univ. of Calabria, Italy
Bachelors in Materials Science and Architectural Engineering.	2012–2013
Assistant Instructor of Physics and Mathematics.	Univ. of Paris VII, France
Bachelors in Physics, Chemistry and Life Sciences.	2008–2011
- HIGH SCHOOL	

- HIGH SCHOOL

	Instructor of Experimental Physics.	Liceo	"А.	Volta",	Reggio	Calab	ria,	Italy
	Teaching in the context of the project entitled "Liceo Matem	atico".			Spring	2023 (and	2024
•	Experiments on fluid statics, optics and diffraction with wat	er and	ligh	t waves.				

French Qualification for Assistant Professor.	France
Maître de conférences.	2017
Italian Qualification for teaching in high schools.	Italy
Active Formative Apprenticeship, for teaching Mathematics and Physics. Score 99/100.	2015
· Apprenticeship in a high school.	

· Attended classes on the teaching of Mathematics and Physics, Pedagogy and didactics for inclusion, Didactical techniques for inclusion, History of Pedagogy, Theory and Methods of evaluation.

SUPERVISION

Benjamin Reichert Post-doc within the program CNRS-Momentum.	Institute of Physics of Rennes, France 2018–2020
\cdot Thermal active drops and Faraday instability in a rotating liq	luid.
PhD students	
Wilson Reino	CNR-Nanotec, Italy
Joint supervision with Prof. R. Barberi, Univ. of Calabria, It • Capillary surfers.	taly Jan. 2022 - Dec. 2024
<u>Master students</u>	
Samuel Carneiro	CNR-Nanotec, Italy
Master student, École Nationale d'Ingénieurs de Brest, Franc	e. Mar–July 2023
\cdot Setups for the demonstration of experiments in fluid dynamic	S .
Capucine Eudes	CNR-Nanotec, Italy
Master student, École Nationale d'Ingénieurs de Brest, Franc	e. Mar–July 2022
\cdot Wave field of capillary surfers.	
Antoine Bellaigue	Institute of Physics of Rennes, France
Master student in Physics, University of Rennes 1, France.	May-July 2020
\cdot Numerical simulations of a classical wave-particle duality inte	racting with single and double slits.
Jérémy Archer	Institute of Physics of Rennes, France
Master student in Physics, University of Rennes 1, France.	May–July 2020
\cdot Surface reconstruction of Faraday instability patterns.	
Paul Remigereau	Institute of Physics of Rennes, France
Master student in Physics, University of Rennes 1, France.	May-July 2019
\cdot Faraday instability in a rotating fluid.	
Bachelor students	
Alessia Cirimele	CNR-Nanotec, Italy
Final internship, co-supervision with Giuseppe Alì, University	

 $\cdot\,$ Diffraction with a pilot-wave model.

Pierluigi BilottoUniversity of Calabria, ItalyFinal internship, co-supervision with Riccardo Barberi, University of Calabria, Italy.2014• Walking droplets interacting with a single slit.

Giuseppe Di NardoUniversity of Calabria, ItalyFinal internship, co-supervision with Roberto Beneduci, University of Calabria, Italy.2014• Analogies between the De Broglie-Bohm pilot-wave theory and walking droplets.

Walking droplets interacting with boundaries	Lyon, France
Institute of Light and Matter, University Claude Bernard Lyon 1.	Oct. 2017
Hydrodynamic analogs	Boston (MA), USA
Department of Physics at the University of Massachusetts, Boston.	Apr. 2017
Walking droplets interacting with submerged boundaries	Rennes, France
Institute of Physics of Rennes, University of Rennes 1.	Dec. 2016
Three experiments with drops and bubbles on fluid interfaces	Rome, Italy
Marine Technology Research Institute (INSEAN).	May 2015
Faraday instability in deformable domainsCaPhysical Mathematics group, Dept. of Mathematics, Massachusetts Institute of T	ambridge (MA), USA Fechnology. Feb. 2014
The Faraday instability in deformable domains	Paris, France
Jean le Rond d'Alembert Institute, University Pierre et Marie Curie (UPMC).	Jan. 2012
INVITED CONFERENCE PRESENTATIONS	
Three years of projects in experimental physics at the University of Calabria Congress of the Italian Physical Society.	Bologna, Italy Sep. 2024
Capillary disks: sliding friction, capillary attraction and wave-driven propulsion * Selected for long talk at Rencontre du Non-Linéaire (RNL), then meeting canc	Paris, France celed. 2020
Spin lattices of walking droplets.	Nice, France
Conference Waves Côte d'Azur.	Jun. 2019
Diffraction and interference of walking droplets	Sevilla, Spain

Diffraction and interference of walking droplets European Fluid Mechanics Conference.

OTHER CONFERENCE PRESENTATIONS

Non-exhaustive list.

Single-particle diffraction with a hydrodynamic pilot-wave model	Bologna, Italy
Congress of the Italian Physical Society.	Sep. 2024
Self-propulsion of drops floating on an immiscible liquid bath.	Paris, France
International meeting in memory of Yves Couder.	Jun. 2024
Learning through experience: on the introduction of Projects in Experimental Physics at the University of Calabria. Fisciano (SA), Italy	
Congress of the Italian Physical Society.	Sep. 2023
Wave-like behavior of wave-driven particles interacting with linear barriers. Milano, Italy Joint Conference of the Italian and European Community of Condensed Matter Physics. Sep. 2023	
Exploring diffraction of wave-driven particles.	Milan, Italy
Meeting of the Italian Physical Society.	Sep. 2022
Macroscopic quantum analogs	Tropea, Italy
Fifteenth Biennial Quantum Structure 2022 Conference.	Jun. 2022

Sep. 2016

Emergent order in hydrodynamic spin lattices	(online)
*Selected for the workshop of the Institute of Nanotechnology of CNR.	<i>Nov. 2021</i>
Forces on capillary disks	(online)
International Conference of Theoretical and Applied Mechanics	Aug. 2021
Exploring diffraction with a pilot-wave model	(online)
March Meeting of the American Physical Society.	<i>Mar. 2021</i>
Capillary surfers: self-propelling particles at an oscillating fluid int	serface (online)
Meeting of the Italian Physical Society.	Sep. 2020
Exploring diffraction with a pilot-wave model ChMeeting of the Division of Fluid Dynamics of the American Physical Society	icago (IL), USA (online) . Nov. 2020
Capillary surfers: Self-propelling particles at an oscillating fluid in Meeting of the Division of Fluid Dynamics of the American Physical Society	
Friction on water sliders	Vienna, Austria
European Fluid Mechanics Conference	Sep. 2018
Spin lattices of walking droplets	Grenoble, France
Condensed Matter Days, French Physical Society.	Aug. 2018
Partial coalescence of a soap bubble with a soap film	Los Angeles (CA), USA
March Meeting of the American Physical Society.	March 2018
Droplets bouncing on a standing wave field	Denver (CO), USA
Meeting of the Division of Fluid Dynamics of the American Physical Society	. Nov. 2017
Walking drops interacting with submerged boundaries	Mexico City, Mexico
Worskhop "Waves and particles, novel insights".	May 2017
Diffraction and interference of walking droplets	Portland (OR), USA
Meeting of the Division of Fluid Dynamics of the American Physical Society	. Nov. 2016
Walking droplets interacting with planar boundaries	Boston (MA), USA
Meeting of the Division of Fluid Dynamics of the American Physical Society	. Nov. 2015
Faraday instability in deformable domainsSMeeting of the Division of Fluid Dynamics of the American Physical Society	an Francisco (CA), USA . Nov. 2014
Order reconstruction in turbulent nematics	Ravenna, Italy
Meeting of the Italian Liquid Crystal Society.	2014
Faraday instability in deformable domains	Naples, Italy
Meeting of the Italian Physical Society.	2012
Turbulence induces change of topology in calamitic nematics	Rome, Italy
Meeting of the Italian Liquid Crystal Society.	2012
Mutual adaptation of a Faraday instability pattern with its flexible	e boundaries Denmark
Fluid - DTU Summer School.	2011
The interplay of an instability pattern with its flexible boundaries	Agay, France
Conference "On growth and forms" in honour of Prof. Yves Couder.	2010

Faraday instability in deformable domains Fluid - DTU Summer School	$\begin{array}{c} \text{Denmark} \\ 2009 \end{array}$
Force measurements at nanoscale by an atomic force microscope	Cortona, Italy
Summer course of Scuola Normale Superiore.	2006

ACTIVITY AS A REVIEWER

Reviewer of two projects for the French National Research Agency (ANR)

$\mathbf{Referee}$

2016-present

2024

Across the years, I have been a referee for Physical Review Letters, Europhysics Letters, European Physical Journal E, Physics Letters A, Physical Review Fluids, European Journal of Physics, Physics of Fluids, Chaos.

LANGUAGES

Self-evaluation according to the criteria of the Common European Framework of Reference for Languages.
